# 1 Introduction

This section starts establishing the goal and scope of the present deliverable, and shows references to other deliverables for further information.

## 1.1 Goal and Scope

The semantic catalogue will store and index screen-flow resources and back-end Web services, locate appropriate Web services for users, endow gadgets with functionality based on Service descriptions and resolve mediation problems between gadgets and their back-end services.

This document serves as an appendix to the semantic catalogue deliverable.

## 1.2 Changes from previous version

This document is not intended to provide any further information regarding the semantic catalogue prototype. For information regarding where the code of the catalogue can be found, installation instructions, system requirements, a overview of the catalogue architecture and a detail API, please read [Palaghita and Rivera, 2010].
